件名: "Can nuclear energy..."

Dear Fuji-ie-san,

with great enjoyment I read your above-mentioned article in the "Atomwirtschaft". Obviously you are becoming gradually a philosopher and cosmologist. With right you pointed out the relevance of our problems in nuclear technology and those in universe, where star-generation and star-destruction is going on since a dozen billions of years. And the newly detected phenomena of dark matter and dark energy come on top!

Well, once again my very compliments
and my best regards
for you and your family
yours Willy Marth, Karlsruhe
