Tokyo 100-8970, Japan

Dear Dr. Fuji-ie:

I would like to express my appreciation for your personal commitment over many years of dedicated service to strengthening U.S.-Japan understanding and cooperation on nuclear energy. Your efforts have resulted in valuable exchanges among government, industry, and the scientific community in the United States and Japan. Your leadership in helping to advance Japan's nuclear energy program has served as a positive example for nuclear power development in the United States.

President Bush is strongly committed to expanding this important energy source by promoting research into the next generation of nuclear power plants and encouraging new investment in nuclear plants in the United States. As we implement this vision, we at the Department of Energy look forward to further strengthening our long-standing nuclear energy partnership with Japan.

Once again, we extend our appreciation to you for esteemed contribution to advancing nuclear energy in the world today.

Sincerely,

A handwritten signature in cursive script that reads "Spencer Abraham".
